

Getting Ready for the Holidays with Emtek

It's that time of the year again! It gets dark out earlier, it's chilly, and you're also probably scrambling to complete your home renovation projects before friends and family arrive for the holidays, right? The dining room, kitchen, and living room are bound to be key players during the holiday season, so it's important to make sure that these spaces are primed for activity. What better way to maximize the holiday cheer in your home than installing beautiful [Emtek](#) hardware throughout these spaces?

Ornaments are to a Christmas tree as hardware is to the home. Installing [Emtek](#) hardware will undoubtedly add the touch of elegance that your home needs to create a lasting impression on your guests.

As for which specific products to choose, here are a few that we recommend for the holiday season:

Crystal and Porcelain

Crystal and porcelain style knobs quickly come to mind as they bring about a jewelry-like grace and sophistication to the home. Emtex carries a multitude of crystal and porcelain products in both door and cabinet hardware options that will shine alongside your holiday ornaments.

Polished and Unlacquered Finishes

[Polished Nickel](#), [Polished Chrome](#), [Polished Brass](#), and [Unlacquered Brass](#) are all fantastic choices to coordinate with the silvers and the golds of your holiday décor (not to mention they add a touch of bling all year long!). Select hardware from our door and cabinet hardware collections include these gems:

Oil Rubbed Bronze Finish

And who can forget about good ol' Oil Rubbed Bronze? [Oil Rubbed Bronze](#) has a classic warm and earthy feel to it that will surely give your home a welcoming quality. Incorporating any of these pieces will tie together a space beautifully.
